

SOLFORD, 1640.
A New Almanack, and
Prognostication, for the
yeere of our Lord God,
1640.

Being the Bissextile,
or LEAP-YEARE.

Calculated especially for the La-
titude and Meridian of the most
honourable City of London: But
may very well serve for most parts of
Great Brittain.

By Arthur Sofford Philomathitt.

*Os homini sublime dedit, Caelumq; videre
Iussit, & erectos ad sidera tollere vultus.*

LONDON,
Printed by R.O. for the Company
of STATIONERS.

Vulgar Notes and moveable Feasts, &c. 1640.

A deepe Snow.

61

An Earthquake in England, Aprill 6.

60

Tilbury Campe, July 25.

52

William Hacker causing himselfe most blasphemously to be proclaimed CHRIST, & executed in Cheape-side, London July, 28.

49

The New Starre in the Constellation of Cignus first obserbed.

40

A great Plague in London, whereof dyed in one yeare, 10578. besides 7666. which dyed of other Diseases.

37

The Gunpowder Treason discovered, November, 5.

35

An hard Frost.

32

The noble Prince Henry dyed.

28

The Illustrious Prince Palatine of the Rhine, married the vertuous Lady Elizabeth, Daughter to King James.

28

Middletons Water-woke finished.

27

A Comet or blazing Starre, from Novem. 18, untill December 16 following.

22

An exceeding great Plague in London, and others other places of England, whereof dyed in London in one yeare 35417, besides 18848 which dyed of other Diseases.

15

A very great Snow.

4

Another very deepe Snow.

2

astro.

A Prognostication,

Astronomicall calculations for this present yeare, 1640.

The true Proceſſion of the Equinoctiall, or the diſtance of the firſt Starre of Aries from the Equinoctiall point, according to the Prutenick Tables is 28 deg. 28 min. 6 ſec. and 39 thirds. But according to Tycho Brahe and Kepler, it is 28 deg. 10 min. and 9 ſeconds.

The Obliquity of the Zodiac according to the Prutenick accompt. is 23 deg. 28 min. 0 ſec. 14 thirds. But according to Tycho Brahe, it is 23 deg. 31 min. 30 ſeconds. And Kepler (accompting the Sunns greateſt Parallaxe leſſe by 2 thirds, then the Ancients and Tycho) would haue the Obliquity leſſe by one minute, viz. 23 deg. 30 min. and 30 ſeconds, very neere the ſame which Regiomontanus ſeteth in his Tables of Direction.

The Eccentricity of the Sunne according to the Prutenick Tables, is 32194 parts, the Semidiameter of the Eccentrick being 10000000. But according to Kepler in the Rudolphine Tables, ſuch an Eccentricity ſhould be 3600 parts, the Semidiameter being 100000.

The Auges of the Planets according to the Rudolphine Tables, January, 1. 1640.	}	♄	26, 46, 47, ♄

The Moones Node Ascendent, January, 1.	}	♊	16, 37, 54, ♄
		♋	68, 7, 32, 51, ♄

The Retrogradations of the Planets this Year
1640.

♄. Saturne is Retrograde from the laſt day of May
until the 17 day of October.

♅. Iup

Sofford, 1640.

Jupiter is Retrograde from the 16 day of April, until the 13 day of August.

Mars is Retrograde from the 8 day of Iuly, until the 7 day of September.

Venus is not Retrograde all this yeare.

Mercurius is Retrograde first from the 10 day of Iuly, until the 2 day of February.

He is Retrograde from the 6 day of May, until the 1 day of May.

He is Retrograde from the 30 day of August, until the 1 day of September.

He begins to be Retrograde againe upon the 24 day of December.

Of the foure Quarters of the Yeare, and first of Winter.

The Winter quarter of this yeare, began according to the Prutenicke Tables upon the 12 day of December, 1639 at 2 of the clocke and 31 min in the after noone: but according to the exact accompt of the Rudolphine Tables, upon the 11 day, at 10 a clock and 6 min at night. At which time, the Sunne entred into the Tropicall signe of Capricorne, making the Shortest day and longest night to all that dwell on the North side of the Equinoctiall line. The length of the day being then with vs at London, 7 houres 34 min. and 12 seconds: and the length of the night, 16 houres 25 minutes, and 48 seconds.

The nature of this Quarter is cold and moist, and therefore fiely resembled to the first declining Age, or Regime, to water, and to the West wind,

Of the Spring.

The Spring taketh the beginning when the Sunne entred into the first scruple of the Equinoctiall signe of Aries, making equal day and night throughout the whole world. which commeth to passe this yeare, according to the Prutenicke upon the 10 day of March, at 5 a clocke and 31 min after noone, but according to the Rudolphine accompt upon

A Prognostication

Upon the ninth day, at ten a clocke and 9 min. at night.

The nature of this Quarter is hot and moist, and the foze resembled well to Youth, to Blood, to the Ayre, and the South Wind.

Of the Summer.

The Summer being the third quarter Astronomically, be-
ginneeth when the Sunne entresth into the first scru-
of the Tropicall signe Cancer: which hapneth this ye-
(according to the Puteuick accompt) upon the 11 day
Iune, 43 min. after high noone: but according to the Ro-
dolphine Tables, upon the same day at one a clocke and
min. in the morning. At which time the Sunne make-
th the longest day and shortest night to all that are on the
side of the Equinoctiall line; the Day then continueth
with vs at London 16 houres, 25 min. and 48 seconds, and
the night 7 houres, 24 minutes and 12 seconds.

The nature of this quarter is hote and dry, and the
foze is resembled to Infancie, to Choler, to the Fire, and
the East Winde.

Of the Autumne.

Autumne or the Harvest-quarter, begins alwayes when
the Sun entresth into the Equinoctiall signe Libra, the
by making the dayes once againe equal to the nights in
the world. Which will be this yeare (according to the Pu-
tenick Tables, upon the 13 day of September, 17 min. before
one of the clocke in the morning, but according to the Ro-
dolphine Tables, upon the 12 day at 4 of the clocke and 5
minutes in the afternoone.

The nature of this quarter, is cold and dry; and the
foze not busily resembled to Old age, to Melancholy,
the Earth, and to the North Wind.

Ovid Metamorph. Lib. 2.

Verq; novum stabat cinctum florentie corona,
Stabat muda Aestas & spicae fersa gerebat;
Stabat & Autumnus calcatus sordidus urvis,
Et glacialis Hyems canos byrsuta capillos.

F. C. l. i. f.

Sofford, 1640.

Eclipses.

Here will be presented to the view of the Inhabitants of the Earth this year, two Eclipses of the Sun, but whether of them will be visible in our Horizon.

The first Eclipse will be upon the 10 day of May, being Rogation Sunday, which in generall for all parts of the Earth, where it will be seen in whole or in part, is thus noted in respect of the time, as we account it at London, and that according to the Rudolphine Tables, viz.

The beginning of the Eclipse, at 5 of the clock and a quarter in the afternoone.

And the end of every part of the Eclipse in any part of the Earth at 11 a clocke and 18 minutes.

In the Latitude of 4 degrees South, and the Longitude 202 degrees or 11 houres three quarters Eastward from the Meridian of London, viz. about the Island of Madagascar the Coast of Nova Gunca, the Sunne will be in their morning totally darkened,

In the Latitude of 21 degrees North, and the Longitude of 260 degrees, or 8 houres, 22 min. Westward from the Meridian of London, that is, in a part of Mare Pacificum (called by the Spaniards Mar del Zur) nere to California, the Sunne will be totally Eclipsed in the 90 deg. of the Zodiacke, at their high noone.

In the Latitude of 9 degrees North, and Longitude 223 degrees, or 4 houres 9 min. from the Meridian of London towards the West, viz. nere to the coast of Germania inferior in the South America, the Sunne will be totally darkened.

All places of the Earth more to the North, then 53 and a halfe degrees of North Latitude, and more to the South, then 9 degrees of South Latitude, will not see any the east part of this great Eclipse.

2. The second Eclipse of the Sunne will happen upon the 12 day of November, being Tuesday; which for the generall

A Prognostication,

generall will be thus limited in respect of the time
by, viz.

The beginning will be at 11 of the clocke and 48
in the forenoone.

And the end of all the Eclipse at 5 a clocke. In
Latitude of 12 deg. North, and the Longitude of 28
or 6 houres 25 min. from the Meridian of London
wards the West, viz. at Naco in Nova Hispaniola,

Sunne will arise in their morning totally darkened.

In the Latitude of 16 deg. South, and the Longitude
of 35 deg. or 2 houres 20 min. from the Meridian
London towards the West, upon the East coast of
Gilia, the Sunne will be totally Eclipsed in the 90
of the Zodiacke, at their high noone.

In the Latitude of 7 deg. South, and Longitude of
deg or 2 houres from the Meridian of London towards
the East, viz about the Lake Zaire in the Land of the
bushines or of Prester Iohn, the Sunne will set tot
darkened.

All the places of the Earth more to the North
35 degrees of North Latitude, and more to the South
45 deg of South Latitude, will not see any of this
part of this great Eclipse.

Briefe Rules of Husbandrie.

Sow seeds, plant, grasse, the Moone in Taurus, Vir
Capricorne, or Aquarius, the Wind not Easterly.

Sheere sheepe in the increase of the Moone.

Fell timber for building towards and in the last
Eld or l ebbe Cattell, the Moone in Aries, Sagittar

and Capricorne.

Kill fat Swine for Bacon about full Moone.

Cut Wines in February or March.

Wonne Trees the last Quarter of the Moone,
the Hallowmas and Twelf-day.
